

# 360° PHOTO PRINTING

## PRINTING INFORMATION:

- ▶ The pen colour affects the visual impression of the 360° photo printing. The best printing results are achieved on a white shaft. When printing on colored base coats, white must be used as the basis for the printing data.
- ▶ The printing result can be optimally adjusted using your colour sample.

## DETAILS:

- ▶ TIFF or EPS
- ▶ 1:1 file attachment
- ▶ Text in paths
- ▶ Image resolution 600–1200 dpi
- ▶ CMYK Euroscale, images embedded
