

PRESS RELEASE

CLEAN PEN – CLEAN WORKPLACE – STABILO prime antibac and STABILO bright antibac.

STABILO Promotion Products GmbH | Heroldsberg, 26 March 2020

The STABILO prime antibac and the STABILO bright antibac in white feature a special surface with an antibacterial effect. With plenty of space for advertising, the two twist-action ballpoint pens have a clean look and make the ideal promotional product wherever high hygiene standards apply.

The modern STABILO prime antibac and STABILO bright antibac twist-action ballpoint pens can be passed from hand to hand with a clear conscience: silver ions in the plastic prevent bacteria settling on the surface and ensure an antibacterial effect for the entire duration of its use. Perfect as a promotional item wherever high hygiene standards apply!

The linear design of the pens and the gleaming white of the pen shafts lends a clean look to these cool promotional products. The STABILO prime antibac makes an excellent impression with its elegant metal tip and convenient super-capacity refill in STABILO's high brand quality. The STABILO bright antibac impresses with its slimline look, tried-and-tested X20 refill and excellent value for money. Both pens are made in Europe and offer plenty of room for promotional messages on the shaft, top and clip.

**STABILO prime antibac and STABILO bright antibac –
from hand to hand with a clear conscience.**
